

BLACK MASS BIOLEACH — UNIFIED PROCESS FLOW DIAGRAM

Zero-discharge refinery · 10,000 t/yr spent lithium-ion black mass · gluconic-acid biolixiviant

All six areas on one drawing, placed so that every process connection joins neighbouring areas. Solid lines carry the main process flow; dashed lines are recycles; dotted lines are solids and bleeds. Equipment, sizing, stream tables and notes are in the companion PFD Index.
